

# Dayanand Gawade

I am an IT student with a solid foundation in web development, specializing in React, Next.js, and Tailwind CSS. Proficient in teamwork and problem-solving, I am eager to leverage my skills in a web development internship to contribute to innovative projects and further enhance my technical expertise.

## Work Experience

### Web Developer & Designer (Freelancer)

Agricart Farmers Producer Company Limited  
May 2024 - May 2025

- Developed a responsive home landing page and e-commerce website using Next.js, Tailwind CSS, and Firebase, enhancing user engagement and accessibility.
- Built an admin panel to manage products and orders, streamlining operations and improving overall site functionality.

### Freelance Web Developer

- Designed and developed custom websites for various clients, utilizing technologies such as React, Next.js, and Tailwind CSS to meet specific client needs.
- Collaborated with clients to gather requirements, providing tailored solutions and ensuring timely delivery of projects while maintaining high-quality standards.

## Projects

### ToolBox - Multiple Tools in one place

- Discover our comprehensive collection of web tools designed to streamline your workflow and boost productivity.
- Simplify your workflow, boost productivity, and get things done faster—all in one place.

### SkyBox - Cloud Storage WebApp

- Seamless File Access – Upload, store, and retrieve your files from any device with an internet connection.
- Secure & Scalable – Ensure data protection with encryption and cloud scalability for growing storage needs.

### MiniUrl - URL Shortener

- Created a full-stack application that streamlines the process of shortening URLs using Next.js and Node.js.
- Offers customizable links and analytics for tracking user engagement.
